

FLEXIBLE EDGE CONNECTIVITY & SECURITY

Reliable, secure, and adaptable connectivity for **today's fast-paced world.**

What We Offer

With LinkAmerica HaaS, you get mission-critical wireless connectivity, protected 24/7 and built to grow with your business. Powered by **AI** and **Network Slicing**, it delivers **higher speed, stronger security, and lower costs** — all cloud-managed.

-  Presales support & AI design validation
-  Flexible financing & end-of-term options
-  Hassle-free staging & pre-configuration

-  Global installation & dedicated project management
-  Real-time monitoring & automation

Use cases

Small & Medium Branches:

Fast, secure, and easy-to-manage connectivity.

In-Vehicle Connectivity:

Rugged routers and real-time GPS to stay connected on the move.

Business Continuity & Out-of-Band Management:

Automatic failover and remote troubleshooting to keep operations running.

IoT & M2M Deployments:

Zero-touch provisioning and secure edge computing for cost savings and scalability.

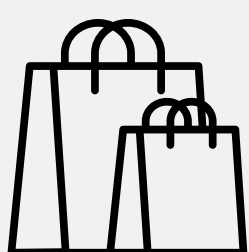

Customer Success Highlights

Restaurants: Seamless Day-1 connectivity and unified security keep your operations running smoothly across all locations.

Public Safety: Advanced dual-modem routers and dynamic traffic management help law enforcement stay connected and focused on their mission.

Retail: Always-on POS and IoT connectivity protect your sales and customer experience, even during network disruptions.

Cloud-Secure Surveillance: Protect your premises with encrypted video feeds that are easy to manage and compliant with industry standards.
